Issue 13 – December 2021

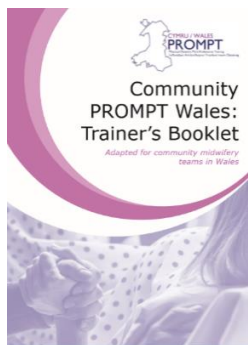

The PROMPT WALES National Train the Trainer!!

On the 20th September the PROMPT Wales National Team held the national Train the Trainer at the Angel Hotel in Cardiff. It was a huge success and everyone who attended thoroughly enjoyed the day. The day was attended by 38 delegates which now increases the PROMPT Wales faculty database to over 400! It was humbling to see training returning to some sort of normality. Special thanks to the local faculty members who supported the national team on the day; Jenilee, Manju, George, Ellie, Kate & Lucy.

Community PROMPT Wales update

Community PROMPT Wales has been fully implemented and mandated since September. The PROMPT Wales team have been supporting local days and it's been exciting to see the training package flourish with over 50 courses planned for 2021/23. Behind the scenes the PWNT are now working on some of the recommendations of the CPW report. One recommendation was further collaboration with WAST. The team are in the process of planning a bespoke Train the Trainer course for paramedics in January to enhance the multi-professional faculty and further the collaboration with paramedics to facilitate on CPW.

**PROMPT
Wales
Leads
Meetings**

What are they? The National Faculty Event held in May brought about many ideas, one of them being an opportunity to catch up with local leads at each Health Board during the programme year.
Why? The meetings will allow local leads to discuss their programmes, share new ideas across Wales and discuss any challenges they may be facing in meeting the PW standards.
How often? The meetings have been planned for twice yearly with the first meeting taking place in December.
The second meeting is planned for June 2022. This meeting will allow the leads to discuss their ideas for their new programmes for 22/23 and discuss themes and trends. This collaboration with one another will allow for sharing of learning and best practices shared nationally.

PROMPT Wales Standards - 2020/21 report

The PWNT are currently behind the scenes working on the annual report against the PROMPT Wales Standards. The team would like to thank all Health Boards for their ongoing support and providing the team with the relevant data. The report will be available for all to read in the New Year.

Here's a reminder of the PROMPT Wales Standards that we will be measuring in this report:

Standard 1 Identify required participants

Standard 2 Development of local syllabus

Standard 3 Multi-Professional faculty

Standard 4 >95% Multi-Professional participation in PROMPT Wales training annually

Well done to all Health Boards for their continued determination to provide high quality PROMPT Wales training and improving outcomes for mothers and babies during a time where operational pressures continue to be challenging. The PWNT acknowledges this and wants to **THANK YOU all!**

University Update

An update from Marianne at University of South Wales;

'USW are beginning to develop a student PROMPT Wales day. A taster day was held, PROMPT scenarios were adapted to meet the students' needs and level of knowledge. In preparation, theory was provided on the emergency scenarios. In addition, they received vital background knowledge surrounding the ethos, aims and successes of PROMPT which was kindly facilitated by Sarah Morris (PROMPT Wales National Midwife). The day was incredibly successful! The atmosphere was filled with enthusiasm and whilst the students worked hard there were also lighter fun moments that contributed to the overall enjoyment of the day. USW are fortunate to have several PROMPT Wales faculty on their team which contributed to the success of the day. Detailed feedback from the students will guide the team to develop their PROMPT programme which was overwhelmingly enjoyed the day and stated that they would feel more confident during placement as a result. They particularly enjoyed using the algorithms and proformas which increased their confidence to use them in the future. It was stated that they would like to repeat the day on a larger scale with more scenarios. We look forward to receiving input and support from the PROMPT Wales team who we would like to thank for their support and encouragement.'

Thank you Team USW, this is truly amazing to see and we look forward to teaming up very soon.

Other exciting PROMPT Wales news...

First publication for PWNT - Congratulations to Sophie Renwick & the team on the 'PROMPT Wales project' that has been recently published in the BMJ. Available online so go take a look...
