

Entering information for Urgent Primary Care Centres in Locum Hub Wales

Update August 2021

Thanks to Practice Manager and Stakeholder feedback, we have been working with the Team at Locum Hub Wales (GP Wales) to introduce separate UPCC areas in Locum Hub Wales to enter and record UPCC work.

If you are posting a Locum shift for an Urgent Primary Care Centre (UPCC), the Locum Hub can now set up a UPCC as a separate entity from your Practice records. To request a new UPCC location please complete the attached form [here](#).

For reassurance in respect of your Practice Data, other Practice Managers who have access to the UPCC option will not be able to view your Practice details and vice versa; their access to Locum Hub Wales will be determined by their own personal access rights.

All other functionality within Locum Hub Wales would be the same for UPCC locations as for Practice W codes. Please use the notes area when posting a UPCC shift to enter details on the location to arrive at, clinical system used and any guidance to the Locum.

This additional functionality will enable Practices to separate their UPCC bookings from their regular Practice Locum bookings. It will also help to avoid confusion for the location of where the shift will take place – the location of the UPCC can be specified in the notes area if there are multiple locations for the UPCC.

Please do let us know if you have any feedback on Locum Hub Wales or any of the Primary Care Sustainability Tools.
