## Medical Device Alert

MDA/2018/003

Issued: 22 January 2018 at 14:00

In vitro fertilisation (IVF) and assisted reproduction technologies (ART) products –  
precautionary measure

### Summary

Manufactured by CooperSurgical: specific batches of products were manufactured with increased histamine levels in the gentamicin sulphate.

### Action

- Identify affected devices in your inventory (listed in the appendix) and return these to CooperSurgical for a replacement.
- Ensure all relevant healthcare professionals are aware.
- If after reviewing this notice you have further technical questions or concerns please contact your sales representative at CooperSurgical.
- If after reviewing this notice you have further clinical questions or concerns please contact your Human Fertilisation and Embryology Authority (HFEA) Inspector, or the Association of Clinical Embryologists (ACE).
- If any adverse events occur relating to these products, please report this to MHRA via [YellowCard](#) or the relevant devolved administrations (Scotland, Wales and Northern Ireland).

#### Action by

- Clinical embryologists
- IVF clinics
- HFEA licenced centres

#### Deadlines for actions

Actions underway: 05 February 2018

Actions complete: 19 February 2018

## Problem / background

MHRA was made aware by the supplier of gentamicin sulphate API, used in the manufacture of IVF media and associated products, that some batches contained higher than expected levels of histamine due to a change in supplier. It should be noted that histamine is an impurity normally found in gentamicin in low levels because of the manufacturing process

MHRA and the Human Fertilisation & Embryology Authority (HFEA) have worked together to determine whether any risk may have occurred while using affected products in IVF procedures. This included getting advice from experts at the Association of Clinical Embryologists (ACE) and an expert in immunology. The risks, if any, from the increased histamine levels could not be determined from the available scientific literature, therefore this MDA has been published to ensure users are aware of the issue, so they can contact the manufacturer, HFEA, or ACE if they have any concerns.

Affected products (all batches) were manufactured from 07/11/2016 to 30/10/2017.

Products still within their expiry date were distributed from 07/04/2017 to 18/10/2017.
