WHBN 00-01 General design principles

This Welsh Health Building Note provides guidance for the design principles and issues that are applicable to all adult acute in-patient healthcare facilities (although the standards and principles it advocates may be appropriate to follow in all locations where healthcare is provided). It provides an overview of general design principles and is not a comprehensive guide. Because of its general nature, its content will be familiar to experienced architects and healthcare planners. It is intended particularly for those who are new to this work. It may also be helpful for commissioning organisations and regulators, giving an overall picture of the design issues that need to be addressed in a healthcare capital project.

It replaces previous guidance: WHBN 00-01: 2013.
