NHS Wales Carbon Footprint Report 2018-19

Dear Colleague

NHS WALES CARBON FOOTPRINT REPORT 2018-19

In 2019 Welsh Government declared a Climate Emergency for Wales to help trigger more focused and greater action to meet the climate change challenge. Welsh Ministers have also re-enforced the ambition for the public sector in Wales to be carbon neutral by 2030.

In support of this challenge, NHS Wales Shared Services Partnership – Specialist Estate Services has worked with the Carbon Trust to undertake an assessment of the NHS Wales Carbon Footprint for the year 2018-19. This report is a factual update on the emissions across NHS Wales at a point in time. It provides a focus for NHS Wales and officials to deliver actions that NHS Wales can take to reduce emissions as the largest public sector organisation in Wales.

To further develop this work, the Carbon Trust has been commissioned to develop a NHS Wales Decarbonisation Strategic Delivery Plan. This work is underway and due to be completed in the Autumn of 2020.

If you require further information please contact Christopher Lewis, Senior Environment and Facilities Management Advisor on 029 2090 4096 Christopher.Lewis4@wales.nhs.uk.

Yours sincerely,

NH Davies
